

SYSVISION Photoalbum Module integrates SmoothGallery (GPL) into OpenCms as an add-on module package, which allows visitors to experience nicer visual effects on photo display. The module is easy-to-use. Thanks to Jonathan Schmeoul for developing the SmoothGallery in the first place!

## How to use:

**Note:** To use the SYSVISION Photoalbum module, you need at least OpenCms version 7.0.5.

1. Put your Site Path to “/sites/{your\_site\_name}/” (make sure that folder “/sites/{your\_site\_name}/demogallery/” doesn’t exist in your system before importing this module).
2. Go to the OpenCms Administration view
3. Click "Module Management" and select either "Import Module from Server" if the module was placed in the **WEB-INF/packages/modules/** folder of your OpenCms installation, or select "Import Module with HTTP" to upload the module from your local file system
4. Select the SYSVISION Photoalbum Module zip file **com.sysvision.opencms.frontend.photoalbum\_0.x.zip** to import
5. Check if the demo gallery is installed into /sites/{your\_site\_name}/demogallery/

All resources include:

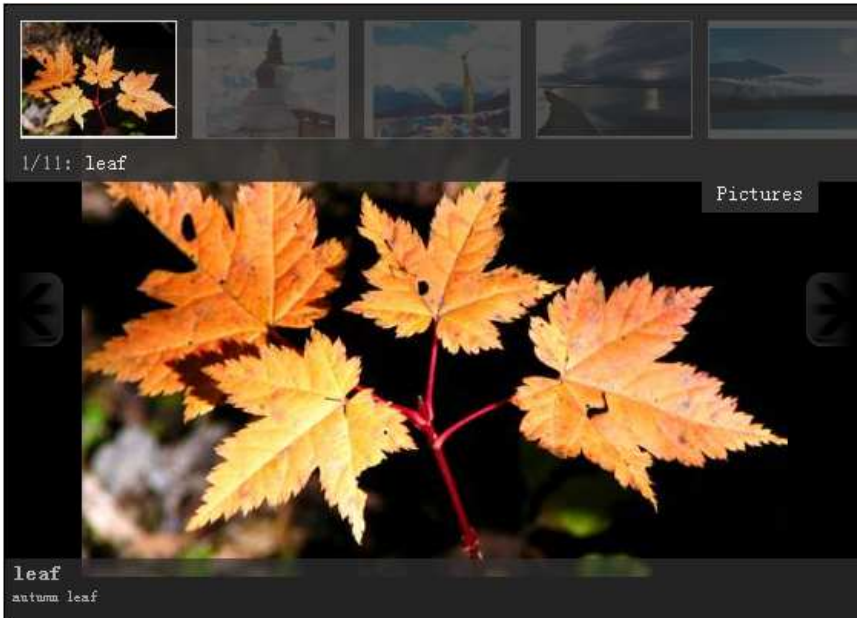

- /system/modules/com.sysvision.opencms.frontend.photoalbum/
  - elements/gallery.jsp: Display, timed and zoom
  - resources/css/jd.gallery.css: Gallery stylesheet
  - resources/css/ReMooz.css: Zoom in/out stylesheet
  - resources/js/jd.gallery.js: Gallery javascript
  - resources/js/ReMooz.js: Zoom in/out javascript

## Screenshot of module demo:

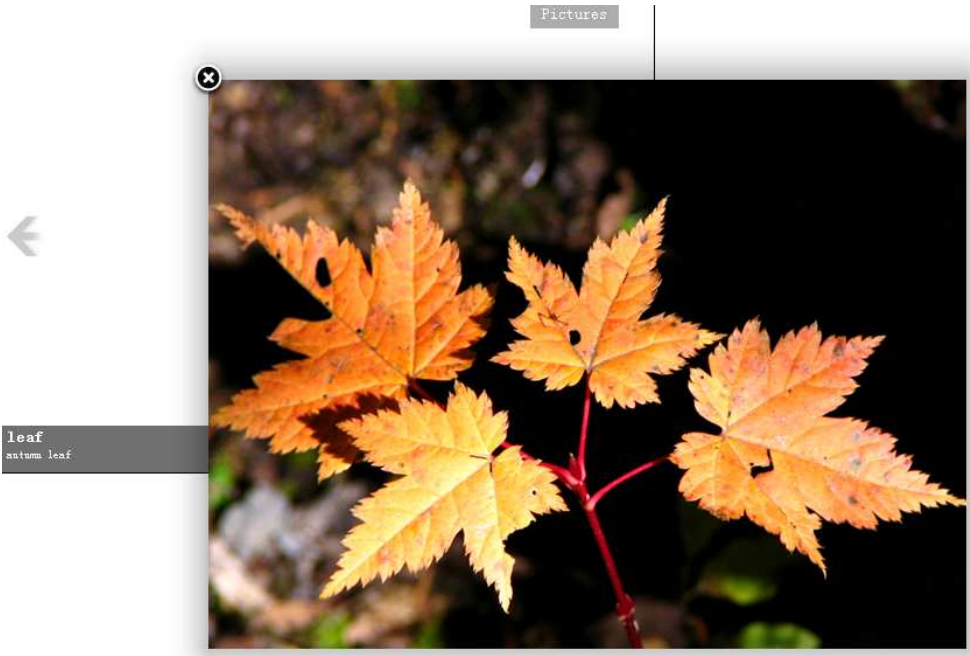

A. Photos can show and slide one by one.

B. Thumbnails in a scrollable section allows visitor to get an album overview and slide to a photo quickly.

C. Photo can be shown by full/customized size.

D. Photos are shown in alphabetical order of the filename (not by NavPos, we considered this way more convenient for local preparation, especially when having many pictures in a folder/album).

		Name	Title	Type	Size
<ul style="list-style-type: none"> <li>/sites/default/</li> <li>  alkacon-documentation</li> <li>  demo_de</li> <li>  demo_en</li> <li>  demogallery</li> <li>  demopages</li> <li>  modulesdemo</li> <li>  release</li> </ul>		01.jpg	leaf	image	253937
		02.jpg	tower	image	223039
		03.jpg	flag	image	235861
		04.jpg	flower lake	image	232420
		05.jpg	fairyland	image	187049
		06.jpg	lake	image	353530
		07.jpg	lotus	image	226657
		08.jpg	red grassland	image	376059
		09.jpg	towers	image	213364
		10.jpg	temple	image	238184
		11.jpg	Jiuzhai Valley	image	389821
	index.html		xmlpage	414	

E. Set title and description of each photo in its properties.

The screenshot shows a photo of autumn leaves. Below the photo is a small thumbnail with the text "leaf" and "autumn leaf". To the right is a "Properties: 1.jpg" panel with the following details:

Property	Value
Title	leaf
Description	autumn leaf

## Notes:

SmoothGallery is an open source project licensed under the GPL.

SmoothGallery uses Mootools 1.2 which may conflict with jQuery when used on the same page.

See <http://docs.jquery.com/Core/jquery.noConflict> for details on how to work around this issue.

SYSVISION Photoalbum Module is made available free of charge as open source from SYSVISION Ltd. China
